

## Traffic Control

[Pole Zero](#) is a premier supplier of Self-Generated Cosite RF Mitigation equipment. Product offerings range from simple two-pole devices to highly sophisticated designs that incorporate high Power Amplifiers, AC/DC and DC/DC converters, circulators, harmonic filters, and digital interfaces compatible with many popular transceivers.

- Tunable filters
- Low noise amps
- Cosite power amps
- Custom Integrated Cosite Equipment (ICE)

Pole/Zero can also provide a comprehensive evaluation of your platform's cosite communication vulnerabilities, ensuring full range communication performance in the most crowded electromagnetic environments.

## Clear Communications

[K & L Microwave](#) is a world leader in the manufacturing of high quality, cost effective filter based solutions for RF/Microwave applications.

Offerings include:

- Ceramic
- Lumped element
- Cavity
- Waveguide
- Tunable
- Duplexers
- Filter based subassemblies

Check out their [Filter Wizard Design Tool](#). Design your filter online and submit a request for quote dynamically.

## Smooth Transfers

[Dow Key Microwave](#) is the world's foremost manufacturer of electro-mechanical switches. There are over 10,000 unique configurations for use in applications ranging from commercial to high rel space. Operating frequencies are DC-40 GHz.

- RF coaxial switches
- RF switch attenuators
- Waveguide switches
- Switch matrices
- Fiber optic switching systems
