

M.S. Kennedy Corp.

Power, Precision & Performance

Since 1971 MSK has been a leader in the design and production of high performance analog microelectronics. Standard products include [operational amplifier and video amplifier](#), [motor drives](#) and [linear regulators](#) and [switching voltage regulators](#). MSK is also a leading producer of [custom hybrids](#), [power hybrids](#) and [multichip module](#), applying our circuit design expertise and versatile packaging capabilities to each circuit produced.

Computer aided design supports our automated manufacturing including surface mount pic and place, automatic die attach, automatic wire bond and automatic test. MSK is certified to both Class H (Military) and Class K (Space) of MIL-PRF-38534, by the Defense Supply Center, Columbus as well as AS9100. We also maintain one of the highest number of QML processes in the industry.

Products include:

- Amplifiers
- Motor Controls
- Power PEMS
- Linear Regulators
- Switching Regulators
- DC-dc Converters
- Filters
- RAD Hard Products
- Video Amplifiers
- Standard Microcircuits Drawing Products

Contact your local [Spartech-South office](#) for literature or product quotations.
