

PCB Fabrication

At **GreenSource Fabrication**, our mission is to provide our customers with cutting-edge solutions while minimizing ecological impact, leading the industry toward a more sustainable and technologically advanced future. We specialize in HDI, and uHDI advanced printed circuit board markets with a heavy focus on microvia reliability. GreenSource Fabrication has state of the art equipment to support small features using various process flows including mSAP and SAP. From the first circuit to the last, we are committed to innovating responsibly. We pursue excellence in all that we do for the betterment of our team, our customers, and our community, especially those who protect, serve, and defend others.

**PIONEERING IN ECO-FRIENDLY PCB MANUFACTURING**

GreenSource Fabrication stands out as North America's first truly environmentally-conscious PCB Fabrication facility. Our commitment to sustainability is demonstrated through our proprietary Aqua Regan Kinetics System (ARK) a Zero Liquid Discharge (XLD) technology, setting a new standard in eco-friendly manufacturing processes.

**The GreenSource Size Advantage**

At GreenSource Fabrication, our 75,000 square foot facility is not just a building; it's a powerhouse of PCB manufacturing excellence. Designed with a focus on high mix, low volume parts, our space is perfectly suited for a wide range of production demands. This includes cutting-edge R&D and high-technology parts, where precision and customization are paramount. Our facility's size and layout are strategically optimized to handle these diverse requirements efficiently. Our scalability and versatility ensure that we can seamlessly adapt to and meet the unique needs of our clients, reinforcing our commitment to delivering excellence in every project.
